Where Are We?

www.oraplayer.com

Where Do We Want to Go?

Today's Challenge:
Maximizing Forms Investment While...

- **Integrating** legacy Oracle Forms systems with next generation technologies.

- Achieving modernized, 21st century UI's for our systems

- Enabling Forms as **services** in the cloud.

- Providing **mobile / internet** access to Forms

Avoiding risky and costly migration projects

ORAPLAYER

What is OraPlayer ?

OraPlayer **unlocks the business logic** trapped in your existing Oracle Forms systems and **exposes it** to modern environments.

- Uniquely records Forms business process (Macros) and converts them to webservices / Java API

- Runs Native Forms Business Logic on from any web-based technology on the forms server

- Deployment Wizard Declaratively Builds Mobile Application

ORAPLAYER

OraPlayer – How We Do It?

Step 1 - RECORD

- Recording Forms business scenario using OraPlayer toolbar
- Choose Input / Output parameters

Step 2 – PUBLISH to WEB or API

- Edit Data Parameters
- Define Application Defaults
- Save and Deploy Scenario

Step 3 – DEVELOP or PLAYBACK

- Create UI in ANY Technology
- Playback on ANY platform (Mobile Wizard)
- UI Independent
